DETAILED ACTION

Election/Restrictions

Applicant's election of claims 1-11, and 14-15 in the reply filed on 04/21/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 12-13 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Claims 1-11, and 14-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Oppitz (US 4616125).

Oppitz discloses an apparatus with a self heating feature comprising conductive composite, wherein the at least one conductive component is adapted to couple with a source of electricity, and wherein the at least one conductive component heats up on passage of electricity, wherein the conductive component further comprises an insulating layer at least partially covering the conductive composite. It is noted that claims 3-11 recite particular uses of the heating element or methods of making the device without further limiting the structure and therefore do not distinguish over the prior art of record.
